Area Controller Radar Refresher Training Course

Duration: 10 working days

Purpose of the Course: This course is designed for international participants refresh knowledge and skill required for area radar controllers to provide air traffic services within ATS Surveillance environment also in contingency situations, and to prepare them to provide ATS service with reduced separation standards in harmonization airspace. Training includes lecture within multimedia presentations and activities. Simulator exercise provide practice in a simulated ATC environment using ICAO Standards.

COURSE OBJECTIVES:
- refresh ATS surveillance separation standards and procedures to improve competency
- identify factors that they must consider in environment of reduced ATS surveillance separation standards.
- apply situational awareness technique to enhance their ATS surveillance observation and planning skills.
- identify guidelines in providing ATS surveillance services in case of emergency.
- handle the emergency situation in ATS surveillance services.
- understand the concepts of threat and Error Management and Non-Technical Skills and apply them in a systematic way to manage operational risks and improve ATM safety.
- learn and recognize aircraft operation in Cost Index.

Language of instruction: English

Target Audience
- Air Traffic Controllers Participants who have Area Control Surveillance Ratting.
